

Inventory No.	Government Level	Policy Name	Description / Highlights	Date of Enactment / Effectiveness	Responsible Agency	Eligible Renewable Technologies	Applicable Sectors	Policy Type
1	State	Alternative Energy Law (AEL)	The Alternative Energy Production law requires MidAmerican Energy and Interstate Power and Light to own or to contract for a total of 105 megawatts (MW) of renewable generation, at rates set by the IUB.	1/1/83	Iowa Utilities Board	Solar, Wind, Small Hydro, Biomass, Municipal Solid Waste, Landfill Gas, Anaerobic Digestion	Investor-Owned Utilities	Renewable Portfolio Standard
2	State	Interconnection Standards	Interconnection standards for rate-regulated utilities apply to distributed generation facilities of up to 10 megawatts (MW) that are not subject to the interconnection requirements of the Federal Energy Regulatory Commission (FERC), the Midwest Independent Transmission System Operator, Inc. (MISO), or the Mid-Continent Area Power Pool (MAPP). A distributed generation facility includes qualifying facilities (QFs) under the U.S. Public Utilities Regulatory Policy Act (PURPA) and alternative energy production (AEP) facilities, which are electricity generation facilities that derive at least 75% of their energy input from solar, wind, waste management, resource recovery, refuse-derived fuel, agricultural crops or residues, or wood burning, as well as dam-based hydroelectric facilities. For more information, see the DSIRE Profile link. HF 548 (passed in 2015) provided new rules on safety, specifically the visibility of a disconnect device.	5/1/10	Iowa Utilities Board	Solar, Wind, Hydro, Biomass, Geothermal, Municipal Solid Waste, Landfill Gas, Anaerobic Digestion, CHP	All Customers, Investor-Owned Utilities, Linn Co. Renewable Electricity Co-op	Regulation
2.1	State	Safety of Distributed Electric Generation Facilities	The bill requires the IUB to adopt administrative rules requiring distributed generation facilities installed after the effective date to have a disconnection device that is easily visible and adjacent to the electric meter. Customers must also notify local fire departments of the location of the DG facility and associated disconnection device.	7/1/15	Iowa Utilities Board	DG	All customers	Regulation
3	State	Net Metering	Iowa's statutes do not explicitly authorize the Iowa Utilities Board (IUB) to mandate net metering, but this authority is implicit through the board's enforcement of PURPA and Iowa Code § 476.41 et seq. Iowa's net-metering subrule, adopted by the IUB in July 1984, applies to customers that generate electricity using alternate energy production facilities (AEPs). Net metering is available to customers of Iowa's two investor-owned utilities, MidAmerican Energy and Interstate Power and Light (IPL). MidAmerican Energy and IPL limit individual systems to 500 kilowatts (kW). Customers that have an on-site renewable energy system through an existing third-party power purchase agreement are not eligible for net metering. IPL also limits net metering to customers on the Residential, Farm, or General Service rate schedules, so customers on the Large General Service rate schedule (i.e., customers using more than 20,000 kWh per month) are ineligible to net meter. The Supreme Court ruled that the IUB cannot assert jurisdiction over net metering policies for non-rate-regulated utilities in 1987, but it strongly encourages them to adopt net metering policies on a voluntary basis.	7/1/84	Iowa Utilities Board	Solar, Wind, Hydro, Biomass, Municipal Solid Waste	All Customers, Investor-Owned Utilities	Net Metering

4	State	Alternative Energy Revolving Loan Program (AERLP)	The Alternate Energy Revolving Loan Program (AERLP) provides low-interest loans to individuals and organizations that seek to build renewable energy production facilities in Iowa. Successful applicants receive a low-interest loan that consists of a combination of AERLP and lender-provided funds. The AERLP provides 50% of the total loan at 0% interest rate up to a maximum of \$1,000,000. Rural electric cooperatives and municipal utilities are limited to one loan every 2 years with a maximum loan of \$500,000. The remainder of the loan is provided by a lender at market rate.	1/26/96	Iowa Energy Center	Solar, Wind, Hydro, Biomass, Landfill Gas	All Customers, All Utilities	Loan Program
5	State	Lease Purchase Agreements	Iowa's Treasurer's office offers the ability for state agencies to use lease purchase agreements to purchase energy related equipment. Requires aggregate payback of <6 years	1980s	State Treasurer	n/a	State agencies	Financing
6	State	Advanced ratemaking procedures	In determining the applicable ratemaking principles, the board shall not be limited to traditional ratemaking principles or traditional cost recovery mechanisms. Among the principles and mechanisms the board may consider, the board has the authority to approve ratemaking principles proposed by a rate-regulated public utility that provide for reasonable restrictions		Iowa Utilities Board	n/a	Investor-owned utilities	Regulation
7	State	Rate design workshops at IUB	Rate design workshops at IUB are a forthcoming outcome of the NOI proceeding related to net metering/DG/interconnection. (Mentioned by Brenda in meeting with IUB)	Ordered 10/30/2015; enactment TBD	Iowa Utilities Board		Investor-owned utilities	Regulation
8	State	Energy Assurance Planning	Every two years, Iowa prepares a state energy assurance plan to address the protection of its critical energy infrastructure. Responsibility for this plan is shared between the Iowa Utilities Board, the state Energy Office, and the Department of Homeland Security and Emergency Management.		IUB, IEDA, Homeland Security, others	n/a		Regulation
9	State	Renewable Energy Production Tax Credit	Iowa has two production tax credit programs for renewable energy facilities. An eligible facility can qualify for only one of the two credits: (1) \$0.015/kWh for non-wind facilities of less than 60MW nameplate capacity (IA Code § 476C) or, (2) \$0.01/kWh for 2-30 MW facilities or smaller facilities at schools and hospitals (IA Code § 476B). The tax credit lasts for 10 years after facility begins producing energy.	6/15/05	Iowa Utilities Board	Solar, Wind, Hydro, Biomass, Municipal Solid Waste, Landfill Gas, Anaerobic Digestion, CHP, Hydrogen	Commercial, Industrial, Agricultural Customers	Corporate Tax Credit
10	State	Sales Tax Exemption - Renewable Energy Equipment	Iowa exempts solar, wind, and hydroelectricity equipment from the state sales tax, which is 6%.	Wind - 1993, Solar 7/1/2006, Hydro - 2013	Iowa Department of Revenue	Solar, Wind, Hydro	All Customers	Sales Tax Exemption
11.1	State	Geothermal Heat Pump Tax Credit	Geothermal heat pumps installed on residential property in Iowa are eligible for a tax credit equal to 20% of the Federal Tax Credit (which is 30% of system cost). Credit in excess of the tax payer's liability may be carried forward for up to 10 years. The credit applies to systems installed beginning Jan. 1, 2012, and expires Dec. 31, 2016.	1/1/12	Iowa Department of Revenue	Geothermal Heat Pumps	Residential	Personal Tax Credit

Inventory No.	Government Level	Policy Name	Description / Highlights	Date of Enactment / Effectiveness	Responsible Agency	Eligible Renewable Technologies	Applicable Sectors	Policy Type
11.2	State	Solar Energy System Tax Credit	Individuals and corporations may claim a state tax credit worth 60% of the Federal Investment Tax Credit, which is set at 30% of installed costs (60% * 30% = 18%). Each taxpayer may claim up to \$5,000 for residential systems and \$20,000 for commercial systems, and excess credits may be carried over for up to 10 years. The tax credit will be extended if the federal tax credit is extended at the end of 2016. The total amount of tax credit is limited to \$4.5 M / year, with \$1 M reserved for residential systems.	1/1/12	Iowa Department of Revenue	Solar	Commercial	Corporate Tax Credit
12.1	State	Local Option - Special Assessment of Wind Energy Devices	Any city or county in Iowa may pass an ordinance assessing wind energy conversion equipment at a special valuation for property tax purposes, beginning at 0% of the net acquisition cost in the first assessment year and increasing annually by five percentage points to a maximum of 30% of the net acquisition cost in the 7th and succeeding years.	1/1/94	Iowa Department of Natural Resources	Wind	All Customers	Property Tax Incentive
12.2	State	Cogeneration Replacement Tax Exemption	New cogeneration facilities are exempt from replacement tax by means of a credit.	1/1/10	Iowa Department of Revenue / Local Assessors	Electric Cogeneration Facilities	Commercial	Corporate Tax Credit
12.3	State	Energy Replacement Generation Tax Exemption	Iowa exempts self-generators, landfill gas, and wind from a replacement generation tax of \$0.0006 per kilowatt-hour (kWh) on electricity generated within the state. This tax is imposed in lieu of a property tax on generation facilities. Reduced rate for large hydro.	2008	Iowa Department of Revenue	Wind, Hydro, Landfill Gas	Electric Generators	Corporate Tax Exemption
12.4	State	Methane Gas Conversion Property Tax Exemption	Iowa exempts methane gas conversion property from property tax. Projects may claim the exemption for 10 years, except projects at publicly-owned sanitary landfills.	1/1/2008 (retroactive)	Iowa Department of Revenue	Biomass, Landfill Gas, Anaerobic Digestion	All Customers	Property Tax Incentive
12.5	State	Property Tax Exemption for Renewable Energy Systems	The market value added to a property by a solar or wind energy system is exempt from Iowa property tax for 5 full assessment years.	1/1/78	Iowa Department of Revenue	Solar, Wind	All Customers	Property Tax Incentive
13	State	IADG Energy Bank Revolving Loan Program	The Iowa Economic Development Authority in partnership with the Iowa Area Development Group (IADG) is offering Iowa businesses and industries a low-interest financing option for energy efficiency improvements, renewable energy projects, energy management, and implementation plans. The establishment of the IADG Energy Bank Revolving Loan Fund is intended to provide an ongoing source of low interest financing for the implementation of cost-effective projects that will save energy and money, improve facilities and processes, and enhance job creation and profitability.	2013	Iowa Economic Development Authority & Iowa Area Development Group	Solar, Wind, Hydro	Commercial, Industrial	Loan Program
14	State	Mandatory Utility Green Power Option	All Iowa-based electric utilities must offer green power options that allow customers to make voluntary contributions to support the development of renewable energy sources in Iowa. Utilities must file program plans and tariffs with the IUB; however, the filings for non-rate-regulated utilities are intended to be for informational purposes only.	1/1/04	Iowa Utilities Board	Solar, Wind, Hydro, Biomass, Municipal Solid Waste	All Utilities	Regulation

Inventory No.	Government Level	Policy Name	Description / Highlights	Date of Enactment / Effectiveness	Responsible Agency	Eligible Renewable Technologies	Applicable Sectors	Policy Type
15	State	Small Wind Innovation Zone Program and Model Ordinance	In May 2009 the Iowa Legislature created the Small Wind Innovation Zone Program, which allows any city, county, or other political subdivision to create small wind innovation zones that promote small wind production. In order to qualify for the designation, the city must adopt the Small Wind Innovation Zone Model Ordinance and also establish an expedited approval process for small wind energy systems. System owners must also enter into a model interconnection agreement with an electric utility.	5/1/09	Any sub-division of the State (i.e. city, county, township)	Wind	All Utilities	Regulation
16	State	Solar Easements	Iowa's solar access easement provision allows for access to sunlight to operate a solar energy system. Those who are unable to obtain a voluntary solar easement from a property owner may apply to the solar access regulatory board for an order granting a solar access easement if the relevant city council or county board of supervisors has created such a board. If a Board does not exist, the matter is referred to the local district court. Iowa code also grants municipalities the right to issue ordinances prohibiting subdivisions from including restrictive covenants that limit the use of solar collectors.	1/1/00	Solar access regulatory board (if applicable) or local district court	Solar	All customers	Regulation
17	State	Electric Generation Facility Certificate	Iowa's code and Administrative rules contain provisions for determining if and where electric generation facilities may be built by regulated utilities in Iowa.	1977	Iowa Utilities Board	wind, solar	Electric utilities	Regulation
18	State	Property Assessed Clean Energy (PACE)	PACE program does not currently exist; legislation was introduced in 2014 to establish one, with the intent of authorizing cities and counties to establish property-assessed clean energy programs and authorizing the governing body of any city or county to assist property owners in financing the purchase and installation of distributed generation renewable energy sources or energy efficiency improvements by offering financial terms that are beneficial to the property owner.	Introduced 2/18/2014; Pending	Cities & Counties	Energy Efficiency, Renewables	All customers	Financing
19	State	Renewable Fuel Standard (RFS)	In 2006, Iowa adopted the most aggressive RFS in the country. The RFS requires 25% of motor fuel sold in Iowa to be replaced with biofuels (ethanol or biodiesel) by January 1, 2020. Beginning in 2009, retailers that meet the RFS schedule, which requires them to sell a certain percentage of renewable fuels as part of their total gasoline sales, will be eligible for an ethanol promotion tax credit.	Enacted 2006; Effective 2009	Dept of Revenue (collects reports)	Biodiesel, Ethanol	Commercial	Regulation
20	State	Renewable Fuels Infrastructure Program	Funded by underground storage tank fund, the RFIP gives incentives for installing biofuels tanks and blender tanks. Reimbursement can be for 50% of the costs for specific components of a project with a three year commitment required to sell certain renewable fuels. A five year commitment to store and sell renewable fuels and install certain equipment can result in up to 70% reimbursement for specific equipment or installation costs.	Enacted 2005; Effective 2006; Sunsets 6/30/2016	IDALS / IEDA	Ethanol & Biodiesel	Commercial (Retail)	Grant program
21	State	Sales Tax Exemption - Energy	Iowa exempts electricity, natural gas, and metered fuels such as propane and heating oil, from the state sales tax, which is 6%.	Phased in fully in 2006	Iowa Department of Revenue	n/a	Residential Customers	Sales Tax Exemption
22	State	Gas Tax	Raises the state's fuel tax and provides, but provides a partial (3 cent) exemption for biodiesel blended fuel classified as B-11 or higher.	Enacted 2/25/2015; Effective 3/1/2015	Department of Transportation	Biodiesel	All Customers	Tax

23	State	Biobutanol Extension	A bill for an act relating to renewable fuels, by providing for biobutanol and biobutanol blended gasoline, modifying the rate of the E-15 plus gasoline promotion tax credit and extending provisions for a biodiesel production refund, and including effective date and retroactive applicability provisions. (Formerly SF 2333.) Various effective dates; see section 16 of bill.	5/21/2014; Expires 2017 & 2018	IDALS	Biodiesel (Specifically Biobutanol)	Transportation	Tax Credit/Refund
24	State	Fuel Mix and Emissions Disclosure	Rate-regulated electric utilities must annually disclose the fuel mix of its electricity production and the associated sulfur dioxide, nitrogen oxide, and carbon dioxide emissions.	1/1/04	Iowa Utilities Board	n/a	All Utilities	Regulation
25	State	Underground storage tanks	Iowa DNR regulates underground storage tanks to prevent and detect leaking.	1985	IA Department of Natural Resources	biofuels		Regulation
26.1	State	State-owned vehicle assignments	Vehicles are assigned to maximize the average passenger miles per gallon.		All Iowa State Agencies	Energy Efficiency	State Government	Regulation
26.2	State	State-owned vehicle fuel economy requirements	State vehicle fleet purchases must meet or exceed average fuel economy for the relevant model year.		Department of Administrative Services	Energy Efficiency	State Government	Regulation
26.3	State	State-owned vehicle fueling	Users of state-owned vehicles are required to use gasahol, and drivers of flex-fuel vehicles are required to use E85 unless it is unavailable, in which case they should not fill the tank more than necessary to reach an E85 station. Agencies using biodiesel vehicles must to use biodiesel whenever available.		All Iowa State Agencies	Biofuels	State Government	Regulation
27	State	Emergency energy regulation, including fuel reservations	The Economic Development Authority has authority, on the President's or Governor's emergency proclamation, to regulate the distribution of energy supplies.	1986	IEDA, IDALS	biofuels	All sectors	Regulation
28	State	Emergency regulation waivers	The Governor may waive the hours of service requirements for truck drivers in case of an emergency, such as a propane or liquid fuel shortage or pipeline disruption. The decision must be made in consultation with IDALS and other agencies. Also, the Governor may waive air quality regulations preventing older generators from being used in case of an emergency. The decision must be made in consultation with others, including US EPA.	1981	Governors Office, in consultation with IDALS and other agencies.	biofuels	All sectors	Regulation
29	State	Utility Energy Efficiency Standard	The Iowa Utilities Board approves and oversees electric and natural gas energy savings standards for rate-regulated utilities (MidAmerican and IPL). Municipal and cooperative utilities file energy efficiency plans. All utilities submit annual reports to the IUB. Iowa Code § 476.63 requires consultation with IEDA.	Various	Iowa Utilities Board	Various Energy Efficiency Measures	All Utilities	Energy Efficiency Standard
30	State	Building Energy Code	The State Building Code Commissioner adopts rules via the Building Code Advisory Council and in consultation with the Economic Development Authority. Effective June 1, 2014, the 2012 International Energy Conservation Code (IECC) was adopted as the code for commercial and residential buildings with some amendments. The State is in the process of considering adoption of the 2015 IECC.	IA Code: 2006 2012 IECC adopted in 2014.	Iowa State Building Commissioner	n/a	Residential, Commercial	Building Energy Code

41	State	On-Bill Financing (OBF)	No statewide legislation exists to require or otherwise structure an OBF program; however certain utilities are implementing on their own. Iowa code 476.6 gives the Board the authority to require regulated utilities to offer financing for cost-effective energy efficiency improvements.	Bloomfield Pilot implemented 10/7/2015	Currently: Utilities; Future: Iowa Utilities Board	Energy Efficiency	All customers	Financing
42.1	State	Electric Transmission Lines	Iowa's Code and Administrative rules contain provisions for the ownership and construction of electric transmission lines, with particular provisions related to crossing railroads and roads and eminent domain.	Various	Iowa Utilities Board	n/a	Utilities	Regulation
42.2	State	Eminent Domain for electric transmission	Takings under eminent domain require a public hearing with written notice prescribed by the Board. The Board grants powers of condemnation as needed when granting a franchise. There are restrictions on condemning homestead sites, cemeteries, orchards, and schoolhouses for purposes of erecting electric substations. If unused, the right of way reverts to the owner of the property from which the right of way was taken.	2000	Iowa Utilities Board	n/a	Utilities	Regulation
43.1	State	Pipelines and underground natural gas storage	Pipelines and Underground gas storage in Iowa are regulated by the IUB. The IUB must approve construction and land restoration and oversees safety conditions of these facilities. The IUB also may grant eminent domain rights in a process similar to electric transmission lines.	1988	Iowa Utilities Board	n/a	Natural gas suppliers	Regulation
43.2	State	Eminent Domain for natural gas pipelines	The IUB may grant eminent domain rights in a process similar to electric transmission lines.	1995	Iowa Utilities Board	n/a	Natural gas suppliers	Regulation
44	State	Interstate natural gas pipelines	The IUB may act as agent for the federal government in determining compliance with interstate natural gas pipeline standards within the boundaries of IA.	2005	Iowa Utilities Board	n/a	Interstate natural gas pipelines	Regulation
45.1	State	Hazardous Liquid Pipelines and Storage Facilities	Hazardous Liquids Pipelines and Underground gas storage in Iowa are regulated by the IUB. The IUB must approve construction and oversees safety conditions of these facilities. The IUB also may grant eminent domain rights in a process similar to electric transmission lines. Hazardous liquids are defined to include various petroleum products, coal slurries, anhydrous ammonia, liquid fertilizers, and liquefied carbon dioxide.	1995	Iowa Utilities Board	n/a	Hazardous Liquid pipelines	Regulation
45.2	State	Eminent Domain for hazardous liquid pipelines	The IUB also may grant eminent domain rights for hazardous liquids pipelines in a process similar to electric transmission lines.	1995	Iowa Utilities Board	n/a	Hazardous Liquid pipelines	Regulation
46	State	Sovereign Lands Permitting Authority	The Iowa DNR is responsible to manage construction activities on state-owned or -managed lands, and may grant easements to utilities.	Various	IA Department of Natural Resources	n/a	Utilities, Pipeline developers	Regulation
47	State	State Revolving Fund	The Fund provides financial assistance to public water systems (Drinking Water Revolving Loan Fund) and wastewater systems (Clean Water Revolving Loan Fund) for the design and construction of facilities to ensure public health and the provision of safe and adequate drinking water.	1988	IA Department of Natural Resources	n/a	Various	Regulation

48	State	Water Permitting (Ethanol Plants)	Permits required include those for water withdrawal, well siting and construction, water treatment plant construction and water system operation. Additionally, an operator of the system must meet state certification requirements. Well siting requires an on-site survey of the area, which can take 1-2 weeks. The water withdrawal permit requires 45 to 60 days, because public notification is required during that permitting process. Once the design and specifications of the project (including a completed viability assessment) are submitted by a professional engineer licensed in Iowa, the construction permit is routinely issued within 1-2 weeks. After the system is constructed and inspected, the operation permit is typically issued within 1-2 weeks.	1985; various additions & updates	Department of Natural Resources	Ethanol	Manufacturing	Regulation
49	State	Biochemical Tax Credit	Five cent per pound tax credit designed to encourage producers of ethanol and biodiesel to invest in new technology to extract chemicals from biomass for use in consumer products. An eligible business that has been operation in Iowa for <5 years would could claim a max credit of \$1 million. For eligible businesses in operation in the state for > 5 years, the max credit would be \$500,000. The legislation specifies no more than \$15 million would be allocated to the incentive program in each fiscal year. IEDA would direct \$15 million of its existing \$170 million tax credit cap to incentives for biochemical production.	Introduced 3/2/2015; Pending	IEDA	Biochemicals	Renewable chemical producers	Tax Credit
50	State	Life Cycle Cost Analysis of Public Facilities	Life cycle cost analysis is required in the design phase of construction or renovation of state facilities and must include energy use analysis.	1/1/80	Agency responsible for construction	n/a	State Government	Regulation
51	State	Physical plant and equipment local levy (PPEL)	The school board may annually certify a regular PPEL in an amount up to 33 cents per thousand dollars of assessed valuation. Voters may authorize a VPPEL for a period not exceeding ten years and in an amount not exceeding \$1.34 per thousand dollars of assessed valuation.		Dept of Education	n/a	Schools	Financing
52	State	Professional Licensing	State Division of Banking's Professional Licensing Division provides administrative assistance to Boards that control licensing and continuing education requirements of architects, engineers, landscape architects, and real estate appraisers. All of these professions have some effect on energy use in buildings.	Various	Division of Banking	n/a	All sectors	Other
53	State	Commissions on under-served populations	The Department of Human Rights hosts the following Commissions, who have an interest in energy issues: Commission on the Status of African-Americans, Commission of Asian and Pacific-Islander Affairs, Commission of Deaf Services, Latino Affairs Commission, Commission of Persons with Disabilities, Commission of Native American Affairs, Commission on the Status of Women.	Various	Department of Human Rights	n/a	All sectors	Other
54	State	Wildlife takings	The IA DNR is responsible for regulating takings of threatened and endangered species and other wildlife, including migratory waterfowl, under a variety of state and federal laws. This could affect any siting of energy-related infrastructure, both above and below ground.	Various	IA Department of Natural Resources	n/a	Utilities, Pipeline developers	Regulation
55	State	Decorative gas lamps	Prohibition against selling decorative gas lamps made before Dec. 31, 1978. Also required an IUB determination that sale was in public interest.	1989	Iowa Utilities Board	n/a	Natural gas suppliers	Regulation

N/A	State	Residential EnergyAdvantage Loan Program	MidAmerican Energy's EnergyAdvantage Financing Program, in partnership with First American Bank, offers Iowa residential energy customers below-prime financing on installation of qualifying energy efficient equipment. Customers may be eligible for a rebate or financing, but not both. The minimum loan amount available to customers is \$1,000. Interested parties should call MidAmerican for rates and visit the program web site for detailed program brochures. Ratings for central air conditioners must be based on a new condensing unit with a new matched evaporator coil.	Expired 12/31/2012	MidAmerican Energy	Geothermal Heat Pumps, EE Appliances, Duct/Air sealing	Residential	Loan Program
1	Federal	Clean Power Plan	Establishes state specific interim (2022-2029) and final (2030) emissions reductions goals. Iowa's final goal is 1,283 pounds per MWh. The goals can be achieved via a rate or mass-based compliance plan.	Enacted 2015; Effective 2022	U.S. EPA & IDNR	All	Electric-generating units (EGUs)	Regulation
2	Federal	Green Banks Program	(Mentioned in Agency meetings) Less of a specific program than an initiative, the U.S. Dept of Energy released a report in December 2015 highlighting Green Bank (EIP) activities in certain states to illustrate the benefits. DOE plans to launch a webinar series & provide additional resources to assist states in developing Green Banks in 2016. The Global Green Banks Network was announced at COP21	12/7/15; 2016	U.S. Department of Energy	All		Financing
3	Federal	Renewable Electricity Production Tax Credit (PTC)	The federal renewable electricity production tax credit (PTC) is a per-kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources.	1992 (enacted). Extended multiple times	IRS	wind, geothermal, biomass, hydro, landfill gas, waste to energy, energy efficiency	Commercial, Industrial	Tax Credit
4.1	Federal	Business Energy Investment Tax Credit	30% tax credit for solar, fuel cells, small wind; 10% for geothermal, micro turbines and CHP.	2013 / Extended through 2016	IRS	Solar, fuel cells, wind, geothermal, CHP	Commercial, Industrial, Utility, Agricultural	Tax Credit
4.2	Federal	Residential Renewable Energy Tax Credit	A taxpayer may claim a credit of 30% of cost for system serving a dwelling in the U.S.	2005 / Expires 12/31/16.	IRS	Solar, wind, geothermal	Residential	Tax Credit
5	Federal	Rural Energy for America Program (REAP)	REAP provides financial assistance to agricultural producers and rural small businesses in rural America to purchase, install, and construct renewable energy systems, make energy efficiency improvements to non-residential buildings and facilities, use renewable technologies that reduce energy consumption, and participate in energy audits and renewable energy development assistance. These grants are limited to 25% of a proposed project's cost, and a loan guarantee may not exceed \$25 million. The combined amount of a grant and loan guarantee must be at least \$5,000 (with the grant portion at least \$1,500) and may not exceed 75% of the project's cost. In general, a minimum of 20% of the funds available for these incentives will be dedicated to grants of \$20,000 or less. For more information visit the USDA website. In 2015, a total of \$63 million in grants and loans was awarded.	2003	USDA	Solar, Wind, Hydro, Geothermal, Anaerobic digestion, Fuel cells, Micro turbines, Energy Efficiency	Commercial, Government, Agricultural, Institutional	Grant Program
6	Federal	Energy Audit and Renewable Energy Development Assistance (EA/REDA) Program	The Renewable Energy for America Program (REAP) EA/REDA Program provides assistance to agricultural producers and rural small businesses for energy audits and renewable energy technical assistance including renewable energy site assessments. Applicants must submit separate applications for assistance, limited to one energy audit and one REDA per fiscal year. The maximum aggregate amount of an energy audit and REDA grant in a Federal fiscal year* is \$100,000. In 2015, \$2 Million in EA/REDA grant funding is available.	Enacted 2/7/2014; Effective 2015	USDA	n/a	Government, Schools, Agricultural, Institutional, Rural electric co-ops	Grant Program

7	Federal	Qualified Energy Conservation Bonds (QECBs)	Taxable bonds issued by State or local units of government for certain "qualified conservation purposes" which include expenditures for: (i) reducing energy consumption in publicly-owned buildings by at least 20%, implementing green community programs, the production of electricity from renewable energy resources in rural areas, certain qualified facilities for electricity produced from renewables (wind, biomass, solar, landfill); (ii) research to develop cellulosic ethanol or nonfossil fuels, carbon capture and sequestration, increased efficiency of fossil fuel production, auto battery technology, energy reduction in buildings; (iii) mass commuting facilities; (iv) demonstration projects to commercialize green building technology, conversion of agri waste, advanced battery manufacturing, technologies to reduce peak demand; and (v) public education to promote efficiency	2008	U.S. IRS; Iowa Finance Authority	Solar, Wind, Biomass, Geothermal, Hydro, Solid Waste, Landfill Gas, Anaerobic Digestion; EE	State government; Local government	Loan Program
8	Federal	Renewable Fuel Standard (RFS)	RFS is a national policy with the goal of replacing the current amount of petroleum-based transportation fuel, heating oil, and jet fuel with renewable fuels. The long-term goal of RFS is the production of 36 billion gallons of fuel. The current authorization of RFS extends fuel production goals through 2017. Obligated parties are refiners and importers of gasoline or diesel fuel. Compliance is achieved by blending biodiesels/biofuels with standard diesel, or by obtaining credits to fulfill the Renewable Volume Obligation (RVO). A Renewable ID Number (RIN) is generated when a producer makes a gallon of renewable fuel, can be assigned to a specific batch of fuel, and can be traded to meet compliance.	2005	U.S. EPA, USDA, DOE	Biomass, cellulosic biofuel, advanced biofuel, renewable fuels	Commercial, Industrial	Regulation
9	Federal	Corporate Average Fuel Economy (CAFE) Standards	Requires automakers to meet sales-weighted average fuel economy for their new vehicle fleet each year.	1975	U.S. EPA; U.S. DOT	n/a	Automakers	Regulation
10	Federal	Biorefinery Assistance Program	USDA Rural Development is offering loan guarantees for the development, construction, and retrofitting of commercial-scale biorefineries. Eligible borrowers include individuals, entities, Indian tribes, state or local governments, corporations, farm cooperatives or farm cooperative organizations, associations of agricultural producers, National Laboratories, institutions of higher education, rural electric cooperatives, public power entities, and consortium of any of these types of entities. Financed entities must provide at least 20% of the financing for eligible project costs, and applications for funding must include an independent feasibility study and technical assessment. Eligible project costs include the purchase and installation of equipment, construction or retrofitting costs, permit and licensing fees, working capital, land acquisition, and the costs of financing.	2009	USDA	Biomass, Biofuels, Solid Waste, Landfill Gas, Renewable Chemicals	Commercial, Construction, Utilities, Government, Agricultural, Institutional	Loan Program
11	Federal	Repowering Assistance Biorefinery Program	The Repowering Assistance Program provides payments to eligible biorefineries to replace fossil fuels used to produce heat or power to operate the biorefineries with renewable biomass. Reimbursement payments are provided to offset a portion of the costs associated with the conversion of existing fossil fuel systems to renewable biomass fuel systems. Up to 90% of the funds can be utilized during project construction, with the remaining 10% made upon demonstration of successful completion of the project. A maximum of 50% of the total project costs can be reimbursed.	3/14/11	USDA	Biomass, Solid Waste, CHP	Commercial, Construction, Utilities, Government, Agricultural, Institutional	Grant Program

12	Federal	Appliance and Equipment Standards	Provides efficiency standards for over 50 categories of appliances and equipment. Products covered by standards represent about 90% of home energy use, 60% of commercial building use, and 29% of industrial energy use.	1975; various dates for each individual standard.	U.S. DOE	n/a	Appliance and equipment manufacturers	Regulation
13	Federal	Fannie Mae Green Initiative	The Fannie Mae Green Initiative provides owners of multifamily properties (5 or more units) with financing solutions and tools to make smart energy- and water-saving property improvements. Its green financing programs include Green Rewards, Green Preservation Plus, and the Green Building Certification Pricing Break, all of which are eligible for a 10 basis points (0.1%) reduction in the all-in interest rate. All Fannie Mae green loans are securitized as Green Mortgage Backed Securities (Green MBS).	2011, 2015	Fannie Mae	Energy Efficiency	Multifamily Residential	Loan Program
14	Federal	Clean Air Act	The Clean Air Act is a landmark law intended to improve and protect air quality in the U.S. Many of the federal rules located elsewhere within this assessment implement the Clean Air Act.	Enacted 1970; Revised 1977 and 1990.	U.S. EPA	n/a	Electric generation	Regulation
15.1	Federal	Clean Water Act	The Clean Water Act is a landmark law intended to improve and protect water quality in the U.S. It establishes the basic structure for regulating discharges of pollutants into public waterways.	1972	U.S. EPA	n/a	State government; Electric generation; Water utilities	Regulation
15.2	Federal	Steam Electric Power Generating Effluent Standards	The standards address wastewater discharges from power plants operating as utilities.	1974. Amended multiple times, most recently with a final rule published 11/3/15.	U.S. EPA	n/a	Electric generation	
16	Federal	Mercury and Air Toxics Standards (MATS)	Mercury and Air Toxics Standards (MATS) limits mercury, acid gases and other toxic emissions from power plants of 25 MW or greater.	2011; 2014	U.S. EPA	n/a	Electric generation	Regulation
17	Federal	National Environmental Policy Act (NEPA)	Major projects that are performed by a federal agency, receives federal funding, or is subject to federal permitting, are subject to the requirements of the National Environmental Policy Act. Proposed projects must be evaluated based on the need; possible adverse economic, social, and environmental impacts; and governmental environmental goals.	1969	U.S. Council on Environmental Quality; Agencies Implementing Covered Projects	n/a	All	Regulation
18	Federal	Carbon Pollution Standards for New, Modified and Reconstructed Power Plants	Amends the electric generating units New Source Performance Standards for modified and reconstructed facilities for greenhouse gas under Clean Air Act section 111(b). Proposes standards to limit emissions of carbon dioxide from affected modified and reconstructed electric utility steam generating units and from natural gas-fired stationary combustion turbines. Natural gas-fired stationary combustion turbines that supply less than one-third of their potential electric output to the grid are not subject to the rule.	2015	U.S. EPA	n/a	Electric generation	Regulation
